SUMMARY

MCA graduate with hands-on AWS, Docker, and Linux experience from a cloud internship and independent deployment projects, currently continuing AWS training as a cloud computing intern. Looking for an entry-level DevOps or cloud role to grow in automation and infrastructure.

TECHNICAL SKILLS

Cloud:	AWS (EC2, S3, CloudFront)
DevOps Tools:	Docker, Docker Compose, Git/GitHub, CI/CD Fundamentals
Scripting:	Bash (learning), Python (basic)
Systems:	Linux (Ubuntu), SSH, Apache2, Networking basics
Languages:	Java, JavaScript, SQL
Databases:	MySQL, MongoDB, Oracle Database
Tools:	WinSCP, MySQL Workbench, Oracle VirtualBox
Currently Learning:	GitHub Actions, Kubernetes

EXPERIENCE

Cloud Computing Intern — Quillance
Sep 2026 – Present

- Completing structured training on **AWS** cloud computing concepts and core services through guided training modules.

Cloud App Developer Intern — Rooman Technologies
Jan 2026 – Apr 2026

- Deployed and hosted web applications on **AWS** using **EC2, S3, and CloudFront**, configuring Ubuntu servers and Apache2.
- Containerized applications using **Docker** to improve portability and deployment consistency across environments.
- Gained hands-on exposure to **Kubernetes**, learning how deployments, pods, and services scale workloads.
- Managed remote servers via **SSH** and used **Git** for version control, covering the full deployment lifecycle from setup to public availability.

PROJECTS

CloudGadgets — AWS Cloud Deployment Project

AWS EC2, S3, CloudFront, Apache2, Ubuntu, SSH, Git, Duck DNS, Certbot/SSL | *GitHub Repo*

- Deployed a frontend web application on a single **AWS EC2** instance running Ubuntu and Apache2.
- Configured **S3, CloudFront, and DNS routing** to host and deliver static assets efficiently.
- Built cloud infrastructure designed for continuous **24×7 availability**, secured with **Certbot/SSL**.

Dockerized Node.js & MongoDB Application

Docker, Docker Compose, Node.js, Express.js, MongoDB, Ubuntu | *GitHub Repo*

- Containerized a **2-tier Node.js and MongoDB** application using **Docker Compose** for consistent deployment across environments.
- Configured Docker networking and **persistent volumes**, enabling reliable data persistence between services.
- Automated deployment with a single **docker compose up** command, simplifying local development and testing.

EDUCATION

Master of Computer Application (MCA)
2024 – 2026

Institute of Management and Information Technology, Cuttack

Bachelor of Science (B.Sc.) in Mathematics
2021 – 2024

Berhampur University

CERTIFICATIONS

- **AWS Cloud Technical Essentials** — Amazon Web Services (Coursera) *View Certificate*
- **AWS Cloud Practitioner Essentials** — Amazon Web Services *View Certificate*
- Introduction to Frontend Development — Meta (Coursera)
